Section I- Montana High School Completion and Graduation Rate Overview

The Completion and Graduation Rate

The Montana School Accreditation Standards (10.55.603, ARM) require schools to do follow-up studies of graduates and students no longer in attendance, therefore, dropout and graduate data is collected from all public and accredited (by the Montana Board of Public Education) nonpublic schools. For more information on graduate and dropout data definitions and collection procedures, please refer to the Montana Graduate and Dropout Data Collection Handbook.

Dropout data can be used in conjunction with graduate data to build a “synthetic” high school completion rate or “on-time” graduation rate for a specific class of students, even though each student is not followed through high school.

The Completion Rate

The National Center for Education Statistics (NCES) developed a formula as a practical way to calculate a completion rate after studying a variety of calculation methods (see box to the right). This estimated cohort method utilizes both dropout and graduate data and can be calculated for all accredited schools, but does require data from four consecutive years.

Analysis of Completion Rates

- The overall completion rate for the Class of 2003 was 84.9 percent (see Table 1 on the following page).
- For the Class of 2003, females had a higher completion rate (86.5 percent) than males (83.4 percent).
- The race/ethnicity categories of Asian, Hispanic, Black, and Pacific Islander only accounted for 3.6 percent of the 2002-03 graduates and 3.2 percent of the dropouts over four years. Therefore, as with dropout rates, the completion rates for these race/ethnicity categories tend to vary widely from year to year.
- The Class of 2003 completion rate for the “American Indian” race/ethnicity category was considerably lower than the statewide completion rate and that of the “White” category.
- As illustrated on the following page in Figure 1, American Indian students had a three-year average completion rate of 60.6 percent, noticeably lower than the “White” average of 86.4 percent.
- Completion rates for whites have increased slightly for the past three years. Increased completion rates have not been observed for American Indian students.

Completion Rate Formula

$$\text{Completion Rate} = \frac{g_t}{g_t + d_{t-12}^{12} + d_{t-11}^{11} + d_{t-10}^{10} + d_{t-9}^9}$$

Where:

g= number of graduates receiving a standard high school diploma

t= year of graduation

d= dropouts

12, 11, 10, 9 = class level

Example:

The 2002-03 Completion Rate for Montana High Schools = 10,978 Graduates for Class of 2003 divided by (1,953 students dropped out over four years plus 10,978 Graduates for the Class of 2003) multiplied by 100 = 84.9 %

Table 1
2002-03 Montana Completion Rate Summary

	Dropouts					Graduates 2002-03	Completion Rate
	Grade 9 1999-00	Grade 10 2000-01	Grade 11 2001-02	Grade 12 2002-03	4-yr Dropout Total		
Overall Total	398	560	506	489	1,953	10,978	84.9%
Gender							
Male	209	305	288	300	1,102	5,544	83.4%
Female	189	255	218	189	851	5,434	86.5%
Race/Ethnicity							
American Indian	155	144	100	64	463	734	61.3%
Asian	0	5	2	3	10	119	92.2%
Hispanic	8	13	12	11	44	166	79.0%
Black	1	1	3	3	8	44	84.6%
Pacific Islander	0	0	1	0	1	10	90.9%
White	234	397	388	408	1,427	9,905	87.4%

Figure 1: Montana Completion Rates- 2000-01 to 2002-03

The Adequate Yearly Progress (AYP) Graduation Rate

Graduation rate, defined as “the percentage of students who graduate from secondary school with a regular diploma in the standard number of years” (i.e., “on-time”), is the required additional indicator for public high schools in Adequate Yearly Progress (AYP) determinations. Montana’s U.S. Department of Education approved high school graduation rate is an estimated cohort group rate based on the method recommended by the NCES (see box to the right). Public high schools that have at least 20 students in a cohort must have a graduation rate for the “All Students Combined” subgroup of at least 80 percent or make improvement towards this goal to meet this indicator. Montana’s graduation rate is calculated using the formula in the box to the right.

Analysis of AYP Graduation Rates

- The Class of 2003 AYP Graduation Rate for “All Students Combined” was 83.9 percent (see Table 2 and Figure 2 on following page).
- Disaggregated graduation rates are not used for determinations on this indicator. However, for the Class of 2003 the American Indian graduation rate was considerably lower than any of the subgroups. Therefore, schools with predominantly American Indian enrollment may find it more difficult to meet the 80 percent goal.
- Graduate and dropout data for the “Economically Disadvantaged,” “Limited English Proficient,” and “Students with Disabilities” subgroups was collected for the first time by the OPI for the 2002-03 school year. Since the AYP graduation rate formula requires four consecutive years of data, the Office of Public Instruction (OPI) will not be able to calculate graduation rates for these subgroups until data for the 2005-06 school year is collected.
- Although graduate and dropout data for the 2002-03 school year has been collected by the OPI, individual school and district AYP determinations for the 2003-04 school year which use these data will not be made until the winter of 2004. However, for the 2002-03 school year AYP results, 92.5 percent of the public high schools made the graduation rate indicator for the Class of 2002 (see Figure 3 on page 7).

AYP Graduation Rate Formula

$$\text{Graduation Rate} = \frac{g_t}{c_t + g_t + d_{12,t} + d_{11,(t-1)} + d_{10,(t-2)} + d_{9,(t-3)}}$$

Where:

g= number of graduates receiving a standard high school diploma in four years or less (from the time enrolled in the 9th grade) or had an IEP allowing for more than four years to graduate.

c= completers of high school by other means

t= year of graduation

d= dropouts

12, 11, 10, 9 = class level

Example:

The 2002-03 Graduation Rate for Montana Public High Schools = 10,552 “On-time” Graduates for Class of 2003 divided by (1,913 students dropped out over four years plus 105 Not “On-time” Graduates for the Class of 2003 plus 10,552 “On-time” Graduates for the Class of 2003) multiplied by 100 = 83.9 %

Table 2
Montana Public High School AYP Graduation Rate for the Class of 2003

Subgroups	Dropouts					Graduates 2002-03		AYP Graduation Rate
	Grade 9 1999-00	Grade 10 2000-01	Grade 11 2001-02	Grade 12 2002-03	4-yr Dropout Total	Not On-time	On-time

Appendix

Montana public, state-funded, and nonpublic, accredited schools are provided with the Montana Graduate and Dropout Data Collection Handbook that provides detailed instructions for collecting and reporting graduate and dropout data. Reports were received from all accredited schools for graduate and dropout data for the 2002-03 school year.

Traditionally, each fall, schools report graduate data for all high schools and dropout data for grades 7 through 12 by gender and race/ethnicity categories for the previous school year. However, on January 8, 2002, President George Bush signed into law the reauthorization of the Elementary and Secondary Education Act (ESEA), otherwise known as the No Child Left Behind Act of 2001 (NCLB), which increases accountability for student academic achievement for all public schools. The Adequate Yearly Progress (AYP) of NCLB requires that public high schools disaggregate both dropout and graduate data not only by gender and race/ethnicity, but also by the following subgroups: economically disadvantaged, students with disabilities, limited English proficient, and migrant. In addition, public high schools must also report graduate data by whether or not graduates graduated “in the standard number of years” (i.e., “on-time”).

The Office of Public Instruction (OPI) began collecting graduate and dropout data by these additional disaggregations for the 2002-03 school year. The OPI did not collect corresponding enrollment data by these additional categories; therefore, dropout rates can not be calculated. Since the graduation rate formula requires four years of dropout data, graduation rates for these additional disaggregations will not be available until the 2005-06 data is collected.

Graduate Definitions and Data Collection

Montana accredited high schools report graduate numbers to the OPI each fall for the previous school year using the definition in the box to the right.

Graduates are the count of individuals who:

- 1) completed the high school graduation requirements of a school district, including early graduates, during the previous school year,
- or*
- 2) completed the high school graduation requirements of a school district at the end of summer prior to the current school year.

General Education Development Test (GED) recipients **are not** counted as graduates.

Standard Number of Years (i.e., “On-time”) Graduate is an individual who:

- 1) completes a district’s graduation requirements in four years or less from the time an individual enrolled in the 9th grade,
- or*
- 2) has an Individualized Education Program (IEP) allowing for more than four years to graduate.

Dropout Definitions and Data Collection

Dropout rates can be calculated and reported in three different ways: event rates (snapshot of those who drop out in a single year), status rates (proportion of population who have not completed school and are not enrolled), and cohort rates (a more comprehensive picture which follows a sample group of students over time and generalizes their rate to a larger group). The collection method used in this report is an event rate adapted from the National Center for Education Statistics (NCES) at the U.S. Department of Education and is consistent with the requirements of the NCES Common Core of Data (CCD) reporting (see box to the right). This method has been used by Montana schools to report dropout data to the OPI since 1994-95.

Data Limitations

Because the number of students enrolled for small schools and racial minority groups is relatively low, small annual changes in data can cause wide variations in annual completion, graduation, and dropout rates. For example, in a class with 10 students, one dropout would translate to a 10 percent dropout rate. A more realistic indicator for small schools and racial minority groups is an average of several years.

Currently, Montana does not have an individual student information system and, therefore, cannot track individuals across schools and school years. The OPI collects aggregate enrollment, graduate, and dropout counts each fall from schools, which carries with it the risk of misclassification of student data (i.e., reporting a student's race/ethnicity inconsistently between enrollment and dropout data collections, reporting a transfer student as a dropout).

Dropouts are the count of individuals who:

- 1) were enrolled in school on the date of the previous year October enrollment count or at some time during the previous school year and were not enrolled on the date of the current school year October count,
or
- 2) were not enrolled at the beginning of the previous school year but were expected to enroll and did not re-enroll during the year ("no show") and were not enrolled on the date of the current school year October count,
and
- 3) have not graduated from high school or completed a state or district-approved high school educational program,
and
- 4) have not transferred to another school, been temporarily absent due to a school-recognized illness or suspension, or died.
